Proceedings of
Conference on High Strength Steels for Hydropower Plants
July 20 to 22, 2009
Takasaki, Japan

Contents

Preface

1. Aoki, K. and Minami, M.
   Construction of Steel Penstocks using HT100 at Kannagawa Hydropower Plant

2. Cerjak, H., Chene, O., Enzinger, N. and Roos, E.
   Qualification Program for the Rehabilitation of Cleuson-Dixence: Requirements and Results

3. Horikawa, K. and Watanabe, N.
   Application of Extra-High Tensile Strength Steel for Hydropower Plants in Japan

4. Mayrhuber, J. and Stering, P.
   Current Hydro Power Plant Projects of Verbund in Austria and the use of High Strength Steel – an Operators View

5. Guyot, S., Dubois, J.M. and Bryla, P.
   Welding Reparation on Thermo-mechanical HSS

6. Tsuzuki, T., Kawabata, N., Okushima, M., Tokunoh, K. and Okamura, Y.
   Development and Application of 950MPa and 780MPa class High Strength Steel for Penstock

7. Hara, N. and Sato, M.
   Development and Application of Welding Consumables for 950MPa class High Strength Steels
8. Chene, O.
   Welding Processes for the Cleuson-Dixence Shaft

9. Faessel, C.
   Non Destructive Testing of the Cleuson-Dixence Shaft

10. Kannengiesser, Th., Lausch, Th. and Kromm, A.
    Effects of Heat Control on the Stress Build Up during High Strength Steel Welding under Defined Restraint Conditions

11. Wongpanya, P. and Boellinghaus, T.
    Residual Stress Distribution in Competing S 1100 QL Butt-Welds Dependent on Plate Thickness and Restraint Length

12. Kudryavtsev, Y., Kleiman, J. and Iwamura, Y.
    Fatigue Improvement of HSS Welded Elements by Ultrasonic Peening

13. Mochizuki, M., Kitano, H., Okano, S., Kawabata, T. and Sakaibiri, H.
    Mechanical Discussion on 950 MPa Class Steel Plate Welded Joint for Penstock
    Report 1: Characteristics of Deformation and Strength by Numerical Welding Stress-Strain Simulation Considering Microstructural Effect

    Mechanical Discussion on 950 MPa Class Steel Plate Welded Joint for Penstock
    Report 2: Effect of Welding Conditions on Brittle Fracture Behavior and Fracture Assessment

15. Kim, Y. C., Hirohata, M. and Hageyama, Y.
    Modeling of Phase Transformation in Cooling Process and Verification of Its Validity

Minutes of Discussions

Supplemental Essay
   Horikawa, K.
   Design Concept of HSS for Hydropower Plants
